

DVT Prevention Pump

DIVO 100

AgVa Healthcare

Most Effective and Intelligent
 DVT Prevention Device Ever

Specifications

Technical Performance Data

Description	Specification
Garment Types	Foot Calf Calf & Thigh
Alarms	Blockage Disconnection Leakage Low Battery Power Disconnected Over Pressure High temperature Service Reminder Hardware Error
Pressure Range	Foot Sleeves : 140 mmHg Calf Sleeves : 40 mmHg Thigh Sleeves : 45 mmHg
Peak Mechanical Pressure	500 mmHg
Leg Selection	<ul style="list-style-type: none">• Both Legs selection with similar garments• Both Legs with different garments• Single Leg selection
Device Noise	< 52 dB at 1 meter
Multi Pulse Technology	Multi Pulse is a patent pending technology which gives bouts of low level pressure variations at operating pressure which has been shown to significantly reduce deep vein thrombosis.
Multi Chamber Garments	Our garments have multiple chambers which sequentially inflates to provide a positive flow effect to the limbs. Leading to better patient outcomes
Alarm LED Indication	Multi-Colour LED bar
Garment Connection	One touch connection with auto shut-off
Garment Tubing	Anti-kink tubing with colour coded foot selection

Physical Specifications

Description	Specification
Power Input	220 VAC 50 Hz
Size	230 x 240 x 220 mm
Weight	2.2 Kg (approx.)
Case Material	Pure Aluminium with Lifetime Coating
Battery Backup	Upto 6 Hours
